XPlease use reliable contacts enough to flow 3VDC 5μA of current.

※For backlight function model, the input terminals are no. ●, ● and the GND terminal is no. ●.

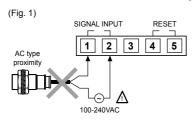

O Free voltage input

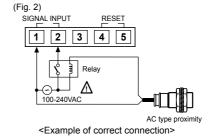

- XAC type proximity sensor cannot be used as the source of count input signals.
- ※Input terminal(♠, ♠)and reset terminal (♠, ♠)are insulated inside.
- XIt is not possible to reset with AC power or DC power.
- When relay contact is used as the source of RESET signal, please use reliable contacts enough to flow 3VDC 5µA of current.

O Input from AC type proximity sensor

In case of free voltage input type, do not connect AC proximity sensors instead of a switch as shown in the figure 1. It may cause malfunction due to sensor's leakage current. Connect a relay as shown in the figure 2.

■ Case detachment and battery replacement

• Case detachment

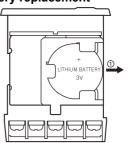

**Hold up Lock part toward ①, ② of the product with the tool and pull toward ③ to detach the case.

MWhen using the tools, be careful not to be wounded.

• Battery replacement

- 1. Detach the case.
- 2. Push the battery and detach it toward ①.
- 3. Insert a new battery with correct alignment of polarity pushing it toward opposite of ①.
- **The battery is sold separately. Please replace a battery by your-self.
- XDo not burn up or disassemble the lithium battery.
